

Halloween Game - FREE Access to the Digital Wizards Member Zone

We're often asked if there is anything we offer children to continue their learning at home once the club has finished, and earlier this year we launched our **new online Member Zone**.

This half term, we're offering children from some of our partner schools free access so they can learn how to create a '**Spooky Skeletons**' Halloween Game. They'll access step by step videos, developing their skills and knowledge, using Scratch.

To get started, parents can register through the following link:

<https://digitalwizards.zone/halloween/>

This activity is more suited to Key Stage 2 children, and they'll need to have access to a device, such as a laptop, that can connect to the internet and use Scratch either online or offline. It could be a fun, creative activity to keep them busy over half term.
