Equality Impact Assessment (EIA) Part 1: EIA Screening

<b>Policies, Procedures or Practices</b>	Supporting Pupils with Medical Conditions Policy	Date	12.12.2025
EIA CARRIED OUT BY:	Jayne Russell	EIA APPROVED BY:	Joan Curran

Groups that may be affected:

Are there any concerns that the policy could have a different impact on any of the following groups? (please tick the relevant boxes)	Existing or potential adverse impact	Existing or potential for positive impact
Age (young people, the elderly: issues surrounding protection and welfare, recruitment, training, pay, promotion)	All groups will be treated fairly and equally, with no bias, discrimination or preferential treatment.	All groups will be treated fairly and equally, with no bias, discrimination or preferential treatment.
Disability (physical and mental disability, learning difficulties; issues surrounding access to buildings, curriculum and communication).	As above	As above
Gender Reassignment (transsexual)	As above	As above
Marriage and civil partnership	As above	As above
Pregnancy and maternity	As above	As above
Racial Groups (consider: language, culture, ethnicity including gypsy/traveller groups and asylum seekers)	As above	As above
Religion or belief (practices of worship, religious or cultural observance, including non-belief)	As above	As above
Gender (male, female)	As above	As above
Sexual orientation (gay, lesbian, bisexual; actual or perceived)	As above	As above

Any adverse impacts are explored in a Full Impact Assessment.

***At Our Lady of Lourdes Catholic Primary School, we seek to create a unique and enabling community whereby children and staff are encouraged to journey beyond their expectations – academically, socially and spiritually – within a culture based on Gospel Values.***

***Love, Live and Learn as Jesus Taught Us***

### 1. Aims

At Our Lady of Lourdes Catholic Primary School we understand that medical conditions requiring support at school can affect quality of life and may be life-threatening.

Our school will support pupils with medical conditions so that they have full access to education, including school trips and physical education.

This policy aims to:

- › Make sure that pupils, staff and parents/carers understand how our school will support pupils with medical conditions
- › Set out the roles and responsibilities for everyone in the school community in regard to pupils with medical conditions
- › Set out the procedure for creating, reviewing and managing individual healthcare plans (IHPs)
- › Set out how we will manage medicines in school
- › Reassure parents/carers that the school will help their child feel safe, supported and included

**The named person with responsibility for implementing this policy is the Head Teacher.**

## **2. Legislation and statutory responsibilities**

This policy meets the requirements under [Section 100 of the Children and Families Act 2014](#), which places a duty on governing boards to make arrangements for supporting pupils at their school with medical conditions.

It is also based on the statutory guidance on [supporting pupils with medical conditions at school](#) and the Early Years Foundation Stage statutory framework from the Department for Education (DfE).

## **3. Roles and responsibilities**

### **3.1 The governing board**

The governing board has ultimate responsibility for making arrangements to support pupils with medical conditions.

The governing board will:

- › Review this policy in a timely manner, in line with the relevant legislation and requirements
- › Make sure that the policy sets out the procedures to be followed whenever the school is notified that a pupil has a medical condition
- › Monitor practice, and staff training, in regards to pupils with medical conditions, in line with this policy

The governing board delegates the day-to-day implementation of this policy to the Head Teacher.

### **3.2 The headteacher in charge of implementing the policy**

The headteacher will:

- › Make sure all staff are aware of this policy and understand their role in its implementation
- › Make sure that there is a sufficient number of trained staff available to implement this policy and deliver against all individual healthcare plans (IHPs), including in contingency and emergency situations
- › Make sure that all staff who need to know are aware of a child's condition
- › Take overall responsibility for the development and monitoring of individual healthcare plans (IHPs)
- › Make sure that school staff are appropriately insured and aware that they are insured to support pupils in this way
- › Manage cover arrangements in the case of staff absence or turnover, to make sure a suitable staff member is always available, and supply staff are briefed appropriately about pupils' medical needs
- › Approve risk assessments for school visits and school activities outside the normal school timetable that involve provision for pupils with medical conditions
- › Contact the school nursing service in the case of any pupil who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse
- › Make sure that systems are in place for obtaining information about a child's medical needs and that this information is kept up to date
- › Implement systems for obtaining information about a child's needs for medicines and keeping this information up to date

### **3.3 Staff**

Supporting pupils with medical conditions during school hours is not the sole responsibility of 1 person. Any member of staff may be asked to provide support to pupils with medical conditions, although they will not be required to do so. This includes the administration of medicines.

Those staff who take on the responsibility to support pupils with medical conditions will receive sufficient and suitable training, and will achieve the necessary level of competency before doing so.

Teachers will take into account the needs of pupils with medical conditions that they teach. All staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

### **3.4 Parents/carers**

Parents/carers will:

- › Provide the school with sufficient and up-to-date information about their child's medical needs
- › Provide evidence of appropriate prescription and written permission for medicines to be administered by staff
- › Be involved in the development and review of their child's IHP, and may be involved in its drafting
- › Carry out any action they have agreed to as part of the implementation of the IHP, e.g. provide medicines and equipment, and ensure they or another nominated adult are contactable at all times

### **3.5 Pupils**

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. Pupils should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of their IHPs. They are also expected to comply with their IHPs.

### **3.6 School nurses and other healthcare professionals**

Our school nursing service will notify the school when a pupil has been identified as having a medical condition that will require support in school. This will be before the pupil starts school, wherever possible. They may also support staff to implement a child's IHP.

Healthcare professionals, such as GPs and paediatricians, will liaise with our school nurses and notify them of any pupils identified as having a medical condition. They may also provide advice on developing IHPs.

## **4. Equal opportunities**

The school will adhere to the legal responsibilities under the Equality Act 2010 and will not unlawfully discriminate against any pupils. Our school is clear about the need to actively support pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

The school will consider what reasonable adjustments need to be made to enable these pupils to participate fully and safely on school trips, visits and sporting activities.

Risk assessments will be carried out so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. In doing so, pupils, their parents/carers and any relevant healthcare professionals will be consulted.

## **5. Being notified that a child has a medical condition**

When the school is notified that a pupil has a medical condition, the process outlined in Appendix 1 will be followed to decide whether the pupil requires an IHP.

The school will make every effort to ensure that arrangements are put into place within 2 weeks, or by the beginning of the relevant term for pupils who are new to our school.

## EYFS Settings: 5.1 Obtaining Information about medicines

The EYFS framework states that settings must include how they obtain information about a child's need for medicine, and a system for keeping this information up to date (see section 11 of this policy).

We will:

- › For new starters, send a form to all parent/carers of pupils after their place at the school has been confirmed, but before their first school year starts, to confirm any medicine(s) their child needs. Where a pupil has a new diagnosis and/or a pupil has moved to the school mid-term, we will send a form and put arrangements in place within 2 weeks
- › Send a reminder to parents/carers at the start of each year in a newsletter, as well as a form to complete, if their child requires certain medicine(s)

We ask that parents/carers proactively inform us by either phone call to the school office on 01454 867160, or an email to [admin@olol.org.uk](mailto:admin@olol.org.uk) if their child's medical needs change during the school year.

## 6. Individual healthcare plans (IHPs)

The headteacher has overall responsibility for the development of IHPs for pupils with medical conditions.

The day-to-day responsibility has been delegated to headteacher and SENDco.

Plans will be reviewed at least annually, or earlier if there is evidence that the pupil's needs have changed.

Plans will be developed with the pupil's best interests in mind and will set out:

- › What needs to be done
- › When
- › By whom

Not all pupils with a medical condition will require an IHP. It will be agreed with a healthcare professional and the parents/carers when an IHP would be inappropriate or disproportionate. This will be based on evidence. If there is no consensus, the headteacher will make the final decision.

Plans will be drawn up in partnership with the school, parents/carers and a relevant healthcare professional, such as the school nurse, specialist or paediatrician, who can best advise on the pupil's specific needs. The pupil will be involved wherever appropriate.

IHPs will be linked to, or become part of, any education, health and care (EHC) plan. If a pupil has special educational needs (SEN) but does not have an EHC plan, the SEN will be mentioned in the IHP.

The level of detail in the plan will depend on the complexity of the child's condition and how much support is needed. The governing board and the headteacher/SENDco, will have responsibility for developing IHPs and will consider the following when deciding what information to record on IHPs:

- › The medical condition, its triggers, signs, symptoms and treatments
- › The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons
- › Specific support for the pupil's educational, social and emotional needs. For example, how absences will be managed, requirements for extra time to complete exams, use of rest periods, additional support in catching up with lessons, counselling sessions
- › The level of support needed, including in emergencies. If a pupil is self-managing their medication, this will be clearly stated with appropriate arrangements for monitoring
- › Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the pupil's medical condition from a healthcare professional, and cover arrangements for when they are unavailable

- › Who in the school needs to be aware of the pupil's condition and the support required
- › Arrangements for written permission from parents/carers and the headteacher for medication to be administered by a member of staff, or self-administered by the pupil, during school hours
- › Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the pupil can participate, e.g. risk assessments
- › Where confidentiality issues are raised by the parent/carer or pupil, the designated individuals to be entrusted with information about the pupil's condition
- › What to do in an emergency, including who to contact and contingency arrangements

## 7. Managing medicines

Prescription and non-prescription medicines will only be administered at school:

- › When it would be detrimental to the pupil's health or school attendance not to do so, **and**
- › Where we have parents/carers' written consent

The person administering the medicine will keep a written record. Parents/carers will always be informed on the same day the medicine has been administered, or as soon as reasonably possible.

Pupils under 16 will not be given medicine containing aspirin unless prescribed by a doctor.

Anyone giving a pupil any medication (for example, for pain relief) will first check recommended and maximum dosages for the pupil's age, and when the previous dosage was taken.

The school will only accept prescribed medicines that are:

- › In-date
- › Labelled
- › Provided in the original container, as dispensed by the pharmacist, and include instructions for administration, dosage and storage

The school will accept insulin that is inside an insulin pen or pump rather than its original container, but it must be in date.

All medicines will be stored safely. Pupils will be informed about where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will always be readily available to pupils and not locked away.

Medicines will be returned to parents/carers to arrange for safe disposal when no longer required.

### 7.1 Controlled drugs

[Controlled drugs](#) are prescription medicines that are controlled under the [Misuse of Drugs Regulations 2001](#) and subsequent amendments, such as morphine or methadone.

All controlled drugs are kept in a secure cupboard in the school office and only named staff have access.

Controlled drugs will be easily accessible in an emergency and a record of any doses used and the amount held will be kept.

### 7.2 Pupils managing their own needs

Pupils who are competent will be encouraged to take responsibility for managing their own medicines and procedures. This will be discussed with parents/carers and it will be reflected in their IHPs.

Class teachers will let their pupils know where their medicine is stored in the classroom and will make sure that these are easily accessible to the pupil.

IHPs will include procedure for staff to follow if a pupil refuses to carry out a necessary procedure or take medicine.

### 7.3 Unacceptable practice

Although school staff will use their discretion and judge each case on its merits with reference to the pupil's IHP, they will keep in mind that it is not generally acceptable practice to:

- › Prevent pupils from easily accessing their inhalers and medication, and administering their medication when and where necessary
- › Assume that every pupil with the same condition requires the same treatment
- › Ignore the views of the pupil or their parents/carers
- › Ignore medical evidence or opinion
- › Send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their IHPs
- › Send an ill pupil to the school office or medical room unaccompanied or with someone unsuitable (e.g. a fellow pupil who is not old or responsible enough)
- › Penalise pupils for their attendance record if their absences are related to their medical condition, e.g. hospital appointments
- › Prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively
- › Require parents/carers, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their pupil, including with toileting issues. No parent/carer should have to give up working because the school is failing to support their child's medical needs
- › Prevent pupils from participating, or create unnecessary barriers to pupils participating in any aspect of school life, including school trips, e.g. by requiring parents/carers to accompany their child
- › Administer, or ask pupils to administer, medicine in school toilets

## 8. Emergency procedures

Staff will follow the school's normal emergency procedures (for example, calling 999). All pupils' IHPs will clearly set out what constitutes an emergency and will explain what to do.

If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent/carer arrives, or accompany the pupil to hospital by ambulance.

## 9. EpiPens/Adrenaline Auto-Injectors (AAI)

Our Lady of Lourdes Catholic Primary School has chosen to purchase a spare AAI for emergency use only, in accordance with the details in this section.

This will be kept ON TOP of the medicine cabinet in the school office – this will be easily accessible and WILL NOT be locked away.

A list will be kept on the front of the medicine cabinet in the school office, which shows any pupils who have been prescribed an AAI by their GP and for whom we have received written consent by their parents/carers to administer the school's own AAI in the event of an emergency, or should the pupil's own AAI not be readily available.

Parents/carers should collect their child's own prescribed AAI(s) from the school office on the very last day of the academic year.

Parents/carers of pupils who have an AAI should complete a new IHCP and Permission to Administer Medication Form each year and give this to the school office, along with their child's Allergy Action Plan from their GP. They should also provide a new AAI(s) on the very first day of the academic year.

The AAI should be: -

- In date
- In its original sealed box and packaging
- The box should be clearly labelled with the pharmacy dispensing label

The pupil's own AAI should be kept in their classroom at all times – the class teacher should make this easily accessible to the pupil and make sure that all classroom staff are aware of its location. It SHOULD NOT be locked away.

Written consent has been obtained from the pupil's parent/legal guardian for use of the school's spare/emergency AAI.

Appropriate support and training for staff should be given in the use of the AAI in line with the schools wider policy on supporting pupils with medical conditions.

The school should keep a record of use of any AAI(s) and inform parents or carers when staff have administered an AAI, and whether this was the school's spare AAI or the pupil's own device.

Ensure that any AAI that has been used is replaced as a matter of urgency

## 10. Training

Staff who are responsible for supporting pupils with medical needs will receive suitable and sufficient training to do so.

The training will be identified during the development or review of IHPs. Staff who provide support to pupils with medical conditions will be included in meetings where this is discussed.

The relevant healthcare professionals will lead on identifying the type and level of training required and will agree this with the headteacher. Training will be kept up to date.

Training will:

- › Be sufficient to ensure that staff are competent and have confidence in their ability to support the pupils
- › Any first aid training includes anaphylaxis and how to administer Epipens/AAls
- › All staff to be made aware of anyone who is at risk of anaphylaxis
- › Fulfil the requirements in all IHPs
- › Help staff to have an understanding of the specific medical conditions they are being asked to support with, their implications and preventative measures
- › Healthcare professionals will provide confirmation of the proficiency of staff in a medical procedure, or in providing medication.

All staff will receive training so that they are aware of this policy and understand their role in implementing it – for example, with preventative and emergency measures so that they can recognise and act quickly when a problem occurs. This will be provided for new staff during their induction.

## 11. Record keeping

The governing board will ensure that written records are kept of all medicine administered to pupils for as long as these pupils are at the school. Parents/carers will be informed if their child has been unwell at school.

IHPs are kept in a readily-accessible place that all staff are aware of.

### EYFS settings: 11.1 Recording information about medicines

The EYFS framework states that settings must include how they obtain information about a child's need for medicine (see section 5 of this policy), and a system for keeping this information up to date.

We will:

- › Enter each pupil's medicine need in the school's system
- › Update our records when parents/carers of pupils inform us of changes to their child's needs
- › Parents/carers should collect any current medication from the school office on the last day of the academic year, along with a new blank IHCP and Permission to Administer Medication form ready for the new school year.
- › On the first day of the academic year, parents/carers should return a newly completed IHCP form and Permission to Administer Medication form to the school office. New medication (in line with the conditions set in section 7 of this policy) should also be handed to the school office with these forms.
- › Keep a record of changes, labelling the most recent record for each child
- › Make sure that all staff have access to records so that they are informed about pupils' medical needs
- › Securely hold this information digitally in accordance with the UK GDPR
- › Inform parents/carers about how they can access their child's information (provided no relevant exemptions apply to their disclosure under the Data Protection Act 2018)

## 12. Liability and indemnity

The governing board will ensure that the appropriate level of insurance is in place and appropriately reflects the school's level of risk.

The details of the school's insurance policy are:

Zurich Municipal Insurance Company– Policy Number QLA-05U004-0013 (on behalf of South Gloucestershire Council)

## 13. Complaints

Parents/carers with a complaint about the school's actions in regard to their child's medical condition should discuss these directly with the headteacher in the first instance. If the headteacher cannot resolve the matter, they will direct parents/carers to the school's complaints procedure.

## 14. Monitoring arrangements

This policy will be monitored by the headteacher and health and safety lead.

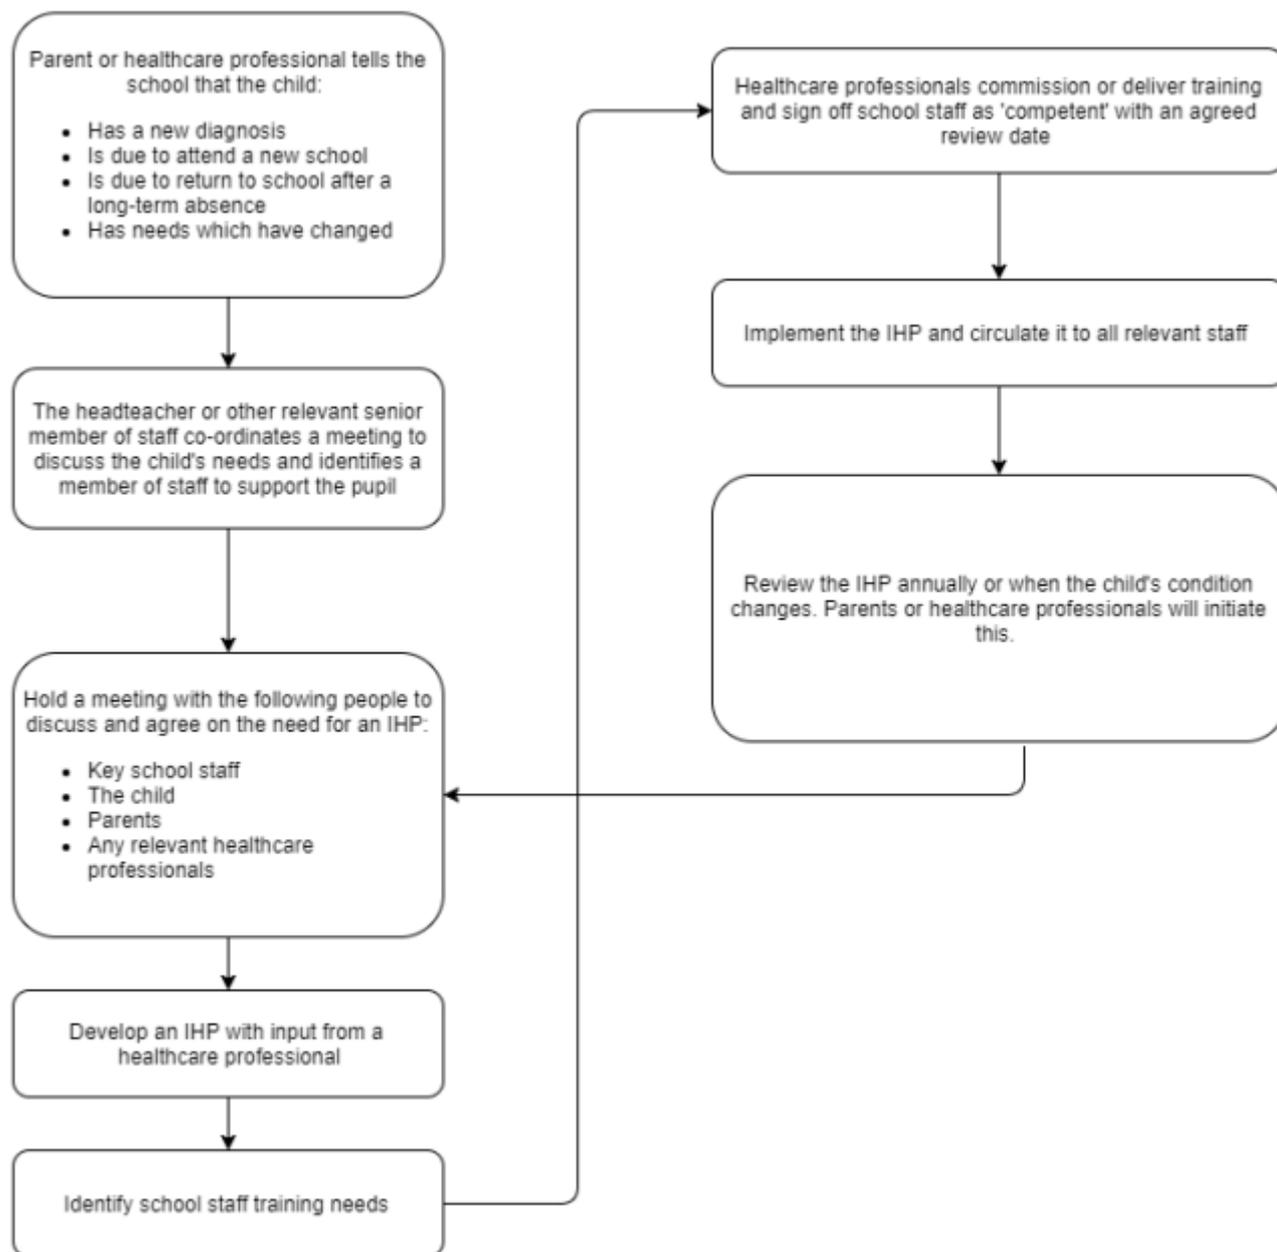

It will be reviewed and approved by the governing board every 2 years.

## 15. Links to other policies

This policy links to the following policies:

- › Accessibility plan
- › Complaints
- › Equality information and objectives
- › First aid
- › Health and safety
- › Safeguarding
- › Special educational needs information report and policy
- › Infection Control Policy for Schools and Educational Settings

## Appendix 1: Being notified a child has a medical condition

## Appendix 2: Procedures for children who are sick or infectious

- › Pupils who have an infectious disease shouldn't attend school/nursery
- › Parents should notify the school if their child has an infectious disease
- › If a pupil becomes unwell during the day – for example, they have a temperature, sickness, diarrhoea or stomach pains – the parents or carers will be contacted to collect their child
- › Pupils with a temperature, sickness, diarrhoea or an infectious disease should not attend school/nursery while they are sick. Depending on the sickness, staff may ask parents to take their child to the doctor before they return to school
- › Pupils with diarrhoea or vomiting should not attend school until at least 48 hours have elapsed since their last episode of diarrhoea/vomiting.
- › Staff will notify parents if a risk to other pupils exists

Children with specific infectious diseases set out in the [UK Health Security Agency's exclusion table](#) will not be allowed to return to school/nursery until the appropriate exclusion period has passed.

We will take the following steps to prevent the spread of infection:

- › Reducing or eliminating sources of infection through good hygiene practices
- › Good handwashing practice
- › Encouraging and facilitating healthy eating
- › Ensuring that regulated food hygiene standard requirements in the maintenance of food preparation areas and preparation of food are followed
- › Championing and educating staff, parents, carers and pupils on the importance of immunisation as a tool against infection (while recognising the individual's right to choose)
