

Space

In Maths, we will be continuing to develop our understanding of number and place value by looking at numbers to 40. We will continue to learn about addition and subtraction with larger numbers and multiple ways of solving these problems.

In History, we will be learning about the history of space travel and some important people who made impressive journeys into space for the first time!

In D&T, we will be exploring the use of moving mechanisms – sliders and levers – to make moving books.

In English, we will be reading 'Beegu'. The children will develop their sentence writing by composing a sentence orally before writing it, sequencing events and sentences, and re-reading what they have written to check it makes sense. We will also be focusing on using capital letters, finger spaces and full stops.

Our writing outcome is to write our own versions of the story with a new lost creature.

In Science, we will be learning all about animals and humans. We will learn about the human body and the different food groups each animal is in. We will learn key vocabulary and use this scientifically.

In RE, we will be learning about what makes places sacred. Before Easter, we will visit St Agnes Church to look at the building and artefacts.

In PSHE, we will be learning about relationships. Who are the people in my life that love and care for me? What are the differences and similarities between people? What are the similarities between boys and girls?

In Music, we will be exploring listening to and using different instruments. We will learn how to repeat a simple piece of music on a glockenspiel and perform this for our friends!

St. Agnes C of E Primary School

Year One

Spring 2 2026
