

# Home, Sweet Home

## What we already know:

We can remember there are lots of continents and one is Africa. We live in Europe.

We know what plants need to grow.

We think meerkats live in the desert.

In Geography, children will keep a weather diary and compare weather around the world.

Children will describe differences between Longsight and Botswana.

## What we want to learn:

What do meerkats eat?

What is it like in Africa?

Do meerkats like hot weather?

What does African music sound like?

In Art we will draw realistic representations of meerkats using pictures and real meerkats as inspiration.

In Computing we will learn how to keep ourselves safe online.

We will use computer programs to display data about the weather.

In Science we will recognize different habitats and the animals and plants that live there. Children will describe how these habitats meet the needs of different animals.

In RE we will learn about sacred books from different religions.

In Music we will compose and perform musical patterns and listen to African music.

St. Agnes C of E Primary  
School

Year Two
