

Reception Summer 1 Knowledge Organiser

More Animals

I would like to know more about ...

- what dinosaurs ate and how they moved
- when dinosaurs lived.
- minibeasts and how they move.
- the importance of bees.
- what a habitat is
- which habitat different animals live in
- why a habitat is more suited to a particular animal
- why some habitats are not ideal for certain animals

Key Vocabulary

prehistoric, extinct

meat eater, plant eater

names of different minibeasts

wings, antennae, legs

web, hive, colony, ant hill, nest

habitat

similarities, differences
