

Safari Park Fractions

To calculate the value of the whole by using unit and non-unit fractions.

When $\frac{1}{3}$ of the giraffes is 4, how many giraffes are there altogether?

When $\frac{2}{3}$ of the giraffes is 8, how many giraffes are there altogether?

When $\frac{1}{5}$ of the lions is 2, how many lions are there altogether?

When $\frac{4}{5}$ of the lions is 8, how many lions are there altogether?

When $\frac{1}{4}$ of the elephants is 6, how many elephants are there altogether?

When $\frac{3}{4}$ of the elephants is 18, how many elephants are there altogether?

When $\frac{1}{6}$ of the monkeys is 5, how many monkeys are there altogether?

When $\frac{5}{6}$ of the monkeys is 25, how many monkeys are there altogether?
