

Weaver Primary School

Guide to Apps and links to the school

To see school applications that we use here is a quick guide.

Arbor is an application for collecting information about your child. You will be able to enter their personal information, medical, dietary and cultural information. This enables you to share sensitive data with us in a secure manner and conforming to General Data Protection Regulations (GDPR). You need to use Arbor to give consent and pay for trips.

Swift Kitchen is available as an app so you can order (EYFS / KS1) and pay for your child's lunch (KS2).

Seesaw – This is an online service where we record our *Reception Learning Journey*. We also use this for homework in Years 1-6.

School website – www.weaver.cheshire.sch.uk This is the main area for information about school, individual classes and policies. It is a site that holds all the information about the school that you should require.

Email – If you need to contact school for any reason please use admin@weaver.cheshire.sch.uk to contact the office team. Individual teachers will have their email addresses displayed on their class page on the website.

Any of the above that require a specific login you will be issued with details at a later date.

More specific links to teaching based material will be issued directly from the class teacher.
