

Year 2 Optional Homework Summer 1 2026

**Tasks should be completed by 22<sup>th</sup> May 2026**

Make a list of materials you can see around your home. Look around each room and create a tally chart to show how many times each material is used. Can you write some sentences about what you have noticed?

Draw a sketch map of your route to school. Think about the symbols you could use for things like bus stops, parks or crossings that you pass on your way. When you have created your sketch map draw a key to help other people to recognise things along the journey.

Use the internet to find out about how a single household object has changed over time. For example; how have irons changed since they were first invented. Make a PowerPoint or poster to show the changes. Think about the materials used and how these may be different.

Investigate how glass or another material of your choice is made. Watch videos or read information and be ready to share this with your friends.

Make a model of a room in a house. Think of the materials you could use for windows, carpets, furniture etc. bring your model in to share with us!
